Features Key

FIXTEC System
For changing accessories in seconds.

Keyless Safety Guard
Safety guard adjustment without the use of a tool.

Impact Driver
For heavy duty screwdriving applications.

Anti-Vibration-System
Significantly reduces vibration by up to 50%.

Soft Hammer Mode
Reduces blow energy for increased control.

HEX 1/4"
1/4" quick release hex fitment.

Safety Clutch
Protects user and machine if a drill bit should jam.

2-Speed Gear
2-speed gearbox, for optimum speed to suit application.

Pendulum Action
For a faster, more aggressive cut.

Dust Extraction
Integrated dust extraction for a clean working environment.

Drill Only
Single mode – rotary drilling.

Kitbox
Heavy duty kitbox.

Electronics
With variable speed pre-selection, soft start, constant speed and overload protection.

Drill And Hammer Drill
2 mode – rotary and rotary hammer drilling.

Kitbag
Heavy duty kitbag.

L.E.D.
For workplace illumination.

Chisel And Hammer Drill
2 mode – rotary hammer drill with chipping/demolition function.

Crosscut Capacity
Maximum crosscut capacity of saw.

Metal Chuck
For enhanced durability.

Combi Hammer
3 mode – rotary and rotary hammer drilling with chiselling/demolition function.

Mitre Saw Blade Laser
Projects the cut line onto material.

Rotatable Handle
Provides optimum comfort during grinding and cutting.

Chisel Drill
Chiselling/demolition machine.

Mitre Capacity
Maximum mitre angle right and left.

Diamond System
Designed for maximum performance when used with diamond accessories.

Hook And Loop
Easy sandpaper attachment without the clamps.

Bevel Capacity
Maximum bevel angle right and left.

14.4V **PRO** LITHIUM ION

The 14,4 V Pro Lithium-ion range from AEG POWERTOOLS strike a balance between ergonomics, comfort and power. Slightly bigger and heavier than the 12 V range, they offer more power and run time, but are still lighter than their 18 V counterparts.

Products in this range:

12V **PRO** LITHIUM ION

The AEG POWERTOOLS range of 12 V Pro Lithium-ion products are ideal for applications which require a lightweight ultracompact unit. The Pro Lithium cells still provide optimum power to suit this type of task, and also benefit from a 30 minute charge time, and have overload protection built into the product to ensure maximum durability of the battery and the tool.

TRIPLE PROTECTION

THERMAL MONITORING	OVER CURRENT MONITORING	INDIVIDUAL CELL MONITORING
 <p>THERMAL OVERLOAD PROTECTION Protects over heating</p>	 <p>CURRENT OVERLOAD PROTECTION Protects over loading</p>	 <p>INDIVIDUAL CELL MONITORING Protects over/under charging</p>

AEG POWERTOOLS Lithium-Ion technology provides the optimum power platform for todays professional user by protecting both battery and machine in 3 ways:

1) Electronic current protection

- shuts down if excessive current draw may harm battery and machine
- thermal shutdown protects battery if temperature gets too high
- protects individual cells from over discharging

2) Robust construction

- AEG POWERTOOLS Lithium-Ion technology benefits from robust internal and external design features as illustrated above, to ensure optimum durability

3) Individual cell monitoring

- individual cells charge and discharge at different rates – AEG POWERTOOLS Lithium-Ion technology offers tailored charging and discharging for individual cells for maximum cell life

Batteries and Chargers

AEG BATTERY PACKS

Long-life, high capacity packs without any memory effect. The excellent contact system with perfectly protected self cleaning contacts offers the lowest possible resistance between battery and tool for optimum performance.

POWER TO PROTECT

AEG POWERTOOLS is committed to producing hard hitting, low vibration hammers which allow professional users to carry out heavy duty job site applications safely.

A new directive in 2005 – The EU Physical Agents (Vibration) Directive 2002/44/EC states that Hand Arm Vibration (HAV) should be considered an official risk to health and safety in the workplace. These vibrations are expressed in terms of acceleration – m/s^2 . All AEG POWERTOOLS hammers are rated by their tri-axle vibration levels as required by this directive, as shown in the table below, so professional users can work safely in line with this directive.

SCREWDRIVING POWERSET

Set of 40 screwdriving bits

COLDfire® is a special hardening treatment for making metals stronger, tougher and more durable. This cryogenic process is a one-time permanent treatment affecting the entire screwdriving bit and it is not just a surface coating. The cryogenic process consists of two steps, firstly the bit is hardened by heating it up to 870° and then freezing the bit down to -148° using a dry nitrogen atmosphere. The result of this process is a bit with exceptional durability.

- + 40% stronger – bit tips hold their form and will accept higher torque forces
- + 45% longer life – over the lifetime of a bit one can expect to drive 45% more screws

TOPHANDLE JIGSAW

STEP 1200 BX

Features

- Powerful 600 watt motor
- Patented FIXTEC system for changing saw blades in seconds
- 4-Stage pendulum adjustment
- Variable speed electronics for control
- AVS anti-vibration mechanism for user comfort
- Ergonomic top handle design with integrated soft-grip
- Sawdust blower keeps cutting line clear for accuracy
- Base plate can be moved backwards for sawing close to edges and for precise mitre cuts to 45°

Standard Equipment – 4 m cable, blade, anti splintering guard, sliding shoe, dust cap, suction adaptor and kitbox

Specification

Power input	600 watt
No load stroke rate	500–3000 spm
Mitre cutting angle to	45°

BODYGRIP JIGSAW

STEP 1200 XE

Features

- Powerful 730 watt motor
- Patented FIXTEC system for changing saw blades in seconds
- 4-Stage pendulum adjustment
- Variable speed selection for correct speed to match the material and blade
- Soft start prevents sudden kick back of machine on start up
- Integrated electronics allows constant speed under load
- AVS anti-vibration mechanism for user comfort
- Ergonomic and very slim body grip design with integrated soft-grip zone
- Dust extraction port
- Sawdust blower keeps cutting line clear for accuracy
- Adjustable dust extraction (front or back) over switch
- Base plate can be moved backwards for cutting close to edges and for precise mitre cuts to 45°

Standard Equipment – 4 m cable, 1 saw blade, anti splintering guard, dust cap, suction adaptor and kitbox

Unique on board active dust collection – patent pending

Features

- 75% dust collection efficiency – best in class!
- Comes complete with all dust collection components
- Height adjustment – for precise depth setting
- Powerful 1010 watt motor for cutting a wide range of materials quickly and easily
- Ergonomic inline motor design, well balanced for extended use
- Dust sealed gearbox design for optimal performance in dusty environments
- Lightweight magnesium guards and base for less user fatigue during extended use
- Spindle lock for quick and easy blade changes

Standard Equipment – Premium 6 tooth fibre cement saw blade, premium 40 tooth saw blade for accurate cuts in wood, diamond disc for tiles, granite, ceramic, cover & clamp for dust free job site (for 10 l bucket), hose 2,60 m for dust extraction, second flange for diamond disc, edge guard, allen key for quick saw blade change, delivered in box

POWER SET SCREWDRIVING BITS

COLDfire®
Cryogenically Treated

- COLDfire® is a special hardening treatment for making metals stronger, tougher and more durable. This cryogenic process is a one-time permanent treatment affecting the entire screwdriving bit and it is not just a surface coating. The cryogenic process consists of two steps, firstly the bit is hardened by heating it up to 870° and then freezing the bit down to -148° using a dry nitrogen atmosphere. The result of this process is a bit with exceptional durability
- + 40% stronger - bit tips hold their form and will accept higher torque forces
- + 45% longer life - over the lifetime of a bit one can expect to drive 45% more screws

METAL DRILL BITS HSS-G COBALT (DIN 338)

Metal drill bits ground from solid extremely heat resistant cobalt-alloyed high speed steel produced according to DIN 338. Polished finish. Split point shaped cutting tip with 135° angle for improved centering – no center punch required.

5% Cobalt content. Withstands high drilling heat.

Type N flute normal angle.

Suitable for drilling high alloy content steels and metals with tensile strengths over 1000 N/mm² like heat and acid proof steels and stainless steel.

Colour: bronze.
